Adobe Creative Cloud Express

How to create a web page in Adobe Creative Cloud Express

Step-by-step instructions for students and teachers

1 HOMEPAGE

After you log in with your school, classroom, or personal account, you'll see the Creative Cloud Express home page.

You can always return here by clicking the Creative Cloud Express icon in the top left.

2 SELECT A TEMPLATE

To get started, select a template best suited for web pages, such as a presentation or a learning journal.

You can also use an Adobe-created template under "Templates for the classroom".

3 ADD CONTENT

Start by adding a title and a subtitle.

Click the plus button to add a cover photo by adding your own image, or select "Find Free Photos" to search through a built-in library of royalty-free images.

4 ADD TEXT, IMAGES, AND MORE

Scroll down to start creating your web page by adding and customizing text, images, and more.

5 EMBED VIDEO CONTENT

You can add video content from sites like YouTube or Vimeo, or import your own from another project.

6 SHARE YOUR CREATION

Decide the best sharing option for you and your classroom.

You can share via a public link,
print or save your work as a PDF,
send it directly to Google Classroom,
Google Drive,
or Microsoft Teams,
or collaborate with another creator.
