

Log in and start creating with Adobe Express.

Congratulations! You and your students now have access to [Adobe Express](#) for Education.

There are three primary ways to seamlessly log in using your district-provided email address:

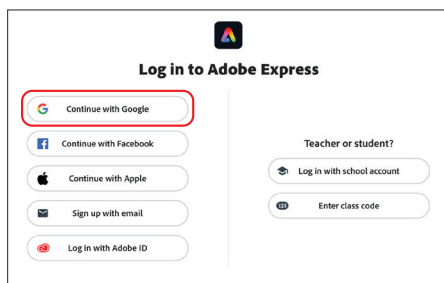

Option 1: Log in through your district's Single Sign-On (SSO) portal.

- Adobe Express is available as an app in both Clever and ClassLink.
- Navigate to your preferred district portal and search for Adobe Express, click the tile, and sign in without having to enter a password.

Option 2: Use your district-provided Google account credentials as follows:

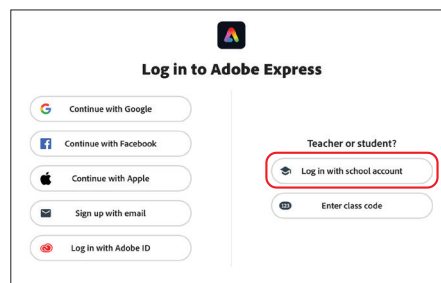

1. Go to [express.adobe.com](#) and select "Continue with Google"

2. Enter your **SCHOOL EMAIL** and select "Next"
3. If your IT admin turned on SSO through Google, you will automatically be signed-in once you select your district email address. If not, you can enter your password on the next screen.

Option 3: Enter your school email address using the "Log In with school account" option.

1. Go to [express.adobe.com](#) and select "Log in with school account"

2. Enter your **SCHOOL EMAIL** and select "Continue"
3. Enter **PASSWORD**

Adobe Express also offers Single Sign-On integrations with Canvas, Google Classroom, and Microsoft 365. If your IT admin has turned on these integrations, you and your students will be able to launch Adobe Express without having to enter a username or password.
